

Threads n Scissors

Battenburg Lace Cross Bookmarks

Method

Hoop 2 layers of water soluble stabilizer. Make sure you are using a new needle before stitching out the designs. If there has been a lot of rain or humidity, you might need to use a third layer of water soluble stabilizer. Also, sometimes, the stabilizer can slide in the hoop pulling the design off. A third layer of stabilizer should stop this.

Stitch out the design using colors of your choice. Rinse out the water soluble stabilizer and lay the bookmarks flat on a towel to dry. They are ready to use when they are dry.

Enjoy!
