Continuous Entredeux

Note: If your needle moves when you switch your machine on, don't put the wing needle in until your machine is switched on and the needle has adjusted itself.

If you are unsure if your machine can take a wing needle, please check with your dealer first.

When using a wing needle, please use an embroidery foot with a biggish hole.

The Bernina Artista tear drop foot does not work with the wing needle so its suggested that the no 9 darning foot or the no 15 embroidery foot is used.

I used the no 9 darning foot on my Bernina Artista to stitch out the wing needle designs.

These designs have die lines in for placement

Method

Hoop 2 layers of water soluble stabilizer. The first color of the design is the marker die line. For the lesson I did mine in a color but rather do yours in the same color as the entredeux—in this case white. Stitch the first color.

Materials

Wingneedle

Batiste Fabric

Water Soluble Stabilizer

Embroidery Thread

Change over to the wing needle. Using spray adhesive spray the stabilizer. Cut the length of batiste needed. Place the end of the fabric over the die lines leaving the rest to the side so more designs can be stitched using placement. Stitch the second color

***Note* When cutting your fabric, cut it at least 1—2 inches large than the width of the design. This becomes the waste fabric for attaching onto garments and lace.**

Change back to a normal embroidery needle and stitch the rest of the design. It's that easy!!!
Now stitch out more of the design along the length of the fabric using the die lines and placement.

When you are done, just rinse out the stabilizer and trim back the waste fabric to about 1/2 an inch either side.
