

Threads n Scissors

Lace Christmas Stockings and Ornaments

To make Lace

Hoop two layers of water soluble stabilizer. Use matching bobbin thread. Stitch out design. Remove stabilizer. Rinse the lace and let it dry.

Lace Ornaments

Stitch out designs using lace instructions above. Don't soak the pieces of lace for too long as some of the stabilizer must remain in the design to make it stiff.

Lace Christmas Stockings

Stitch out front Christmas Stocking designs and a back Christmas Stocking design for each front using the above lace instructions. (14 pieces in all). Cut away the water soluble stabilizer. On the front pieces, cut away the bobbin thread of the tassels. Be careful not to cut the lace threads. Gently ease tassel threads through from the front. Trim ends if necessary. Zig-Zag or stitch by hand the front and back pieces together. Remove water soluble stabilizer. Dry stockings and thread cord or ribbon through hole.

Your Christmas stockings are now ready to be used on the Christmas tree, mantel shelf or as a little gift bag.
