

Threads n Scissors

Lace Tiaras

Method

Hoop 2 layers of water soluble stabilizer. Thread your machine with the metallic embroidery thread. Use a plain thread for the bobbin. Stitch out the Tiara design. Rinse the stabilizer out of the design but don't soak the design for too long. You want the design to be stiff. Lay the design flat and allow to dry. When the design is completely dry, glue the lace tiara design to the thin alic band using hot glue. Allow the glue to cool. The tiara is now ready to use.

Materials

Water Soluble Stabilizer

Metallic Embroidery Thread

Thin Alice Band

Hot Glue
