Organza Embroidery

Method

Put the microtex needle into the embroidery machine. Hoop up two layers of water soluble stabilizer and the organza.

Load the organza design into the machine. Stitch out the design. If you want the design to look the same on the reverse side of the fabric, use the same thread in the bobbin and the upper thread.

When the design is done, rinse out the stabilizer.

Organza designs make for ideal inserts on clothing, or stitch directly onto organza table runners and curtains.

Materials

Nylon organza

Water Soluble Stabilizer

Embroidery Thread

**Microtex Needles
(These give the best
finish on organza embroidery)**
