

# Threads n Scissors

## Ribbon Key Fobs

Hoop 2 layers of water soluble stabilizer. Stitch the first color

### Materials

**Water soluble stabilizer**

**1" wide x 10" long ribbon / webbing**

**Key ring fitting**

**tape**

Place the ribbon over the stitching leaving the remainder of the ribbon to hang of the edge of the hoop. Tape the ribbon in place

Stitch the rest of the design but don't stitch the last color.

# Threads n Scissors

Remove the hoop from the machine. Fold back the ribbon and using a craft knife cut a slit in the stabilizer just above the stitching.

Thread the ribbon through the key ring fitting.

Pull the ribbon through the slit and to the back of the hoop. Leave a space between the stitching and the key ring fitting and tape the key ring into place. Tape the ribbon to the back of the hoop

Stitch the last color. Remove the key fob from the hoop and rinse out the stabilizer. Allow to dry.
