Wing Needle Edgings

Before using a wing needle, please check that your machine can use one. It should say if your machine can use one in the manual or contact your nearest machine agent to find out.

Method

Hoop 2 layers of water soluble stabilizer. Stitch the first color. Cut a piece of cotton fabric 5" x 8". Spray the underside of the fabric with the temporary adhesive spray and place fabric onto stabilizer. Change machine needle to the wing needle and stitch the next color. Change needle back to normal embroidery needle. Trim the excess fabric from around the design. Please trim close to the stitching. Stitch the rest of the design.

Rinse out the stabilizer and allow to dry.

Stitch out as many as you need and using a sewing machine, zig-zag the pieces together!!!

Materials

Water soluble stabilizer

Cotton fabric

Wing Needle

Thin ribbon

Temporary adhesive fabric spray
