

Threads n Scissors

Battenburg Lace Snowflake Doilies 5x7

Materials

Water soluble stabilizer

**Embroidery threads
(I used white and gold)**

**Universal no.70/10
needle**

For best results, use the same thread for the bobbin and upper thread. Pre-test a piece for correct tension. If the bobbin tension is too tight, it will pull on the underside of the design and will be visible. Use an Universal no. 70/10 needle to stitch out the doily designs. Always use 2 layers of water soluble stabilizer when stitching the pieces.

Lets begin creating your doily!!!

You will need to stitch:

6 x panel piece

1 x center piece

Use this method to stitch out the pieces

Hoop 2 layers of water soluble stabilizer. Stitch the design out. Carefully trim stabilizer from around sides and base of panel designs and right around the center design piece.

Threads n Scissors

Once all the panel pieces and the center piece is stitched out, you are ready to assemble your doily. Please don't wash out the stabilizer until the doily is assembled!!!

Use your sewing machine to join the pieces together. Using a medium width zig-zag stitch, lay the panel pieces side by side and stitch them together.

Stitch all 6 panel pieces together and then sew in the center piece. When your doily is completely stitched together, rinse out the stabilizer and lay your doily flat and allow to dry!!!

Enjoy Your Inspiration!

Use different metallic threads for a different variation
