Large Block Layout

The two designs that create a large block is the design eg design1 and the design invert eg design 1 invert

Here is an example of what they would look like. The invert is a mirror of its matching piece.

In order to mark the placement lines of your fabric, you will need a printout of both these designs. Please open the designs in your embroidery software on your computer and print the designs out.

Mark the center of each design. Design center lines are shown in the picture below in blue. The purple rings shows the needle alignment i.e. The starting point of each design. The red lines are the center lines for the fabric.

When it comes to stitching out the blocks, I suggest you start in the bottom left corner and then work your way around. The Large Block consists of 4 designs and will require hooping 4 times.
