Quilt As You Go Old Rose & Accent Quilt Blocks

Quilt As You Go is by far the easiest way to create a quilt block. It is done entirely in hoop and also has an easy to remove stitching line around the block, making it easier to put together using the Quilt As You Go method. There are a lot of lessons on the web how to put together a quilt using the Quilt As You Go method. The Quilt As You Go Quilt Blocks have been

designed to work with this method of putting together of putting a quilt together. You will probably find the two most used methods of putting a quilt together. The first is to put it together with sashing on the other is without sashing. Both look great. The Accent Blocks are the blocks that can go between the ones with the roses. You can make any size quilt. Just stitch out as many blocks as you want. The Accent blocks match the rose embroidered ones, and are also stitched out the same way as the rose blocks.

What you get in your download file:

The Rose blocks for the 5"x5", 6"x6" and 7"x7" hoop (Please check the dimensions of the designs in the colorchart to make sure they fit the embroidery area of your hoop)

The Accent blocks for the 5"x5", 6"x6" and 7"x7" hoop (Please check the dimensions of the designs in the colorchart to make sure they fit the embroidery area of your hoop)

Colorcharts and this tutorial along with our basic instructions on the Quilt As You Go technique to get you started.

Materials:

Cutaway stabilizer

Thin Batting

Cotton Fabric

**Temporary Adhesive
Spray Glue**

Embroidery Thread

Printout of Design

Lets get started on making these blocks. First cut a piece of stabilizer larger than your hoop. I draw a line in the middle of the stabilizer to help hoop the stabilizer straight. This also helps with placing your design in the hoop. Hoop the stabilizer.

Next, cut out the design printout. To get a design printout, open the embroidery design in your embroidery software and printout the design. I use the print preview option to be sure my printout is a 1:1 scale. With your design printout cut out, place the center line of the printout onto the center line that you drew on the stabilizer. Mark where your design is going to be stitched out.

Load the design onto your machine. Use a matching color for the first two colorstops. Stitch the first color onto the stabilizer. This marks where to place a piece of batting and fabric. When cutting your batting and fabric, always make them about 2" bigger than the actual block. Embroidery designs always pull in a bit and you also don't want fabric going under the foot while you stitch. Spray the stabilizer with temporary adhesive spray. Put a piece of batting over the stitched area. Spray the batting with temporary adhesive spray. Put a piece of cotton fabric onto the batting.

Stitch the design out. **Do Not stitch the last colorstop.** Remove the hoop from the machine. Turn it over so the backside of the hoop faces up. Spray the stabilizer with temporary adhesive spray. Put a piece of cotton fabric onto the stabilizer so it covers the embroidered area. This piece of fabric should be the same size as you cut the top fabric. Put the hoop back into the machine and stitch the last colorstop.

And that's it. Block is done. Nice and Easy!!!
