## Quilt As You Go Block—No Sashing

The Quilt As You Go Block with No Sashing has specifically been designed to be used with the Quilt As You Go—No Sashing technique. These blocks stitch in a specific order to create markings so it is easier to trim away excess batting and stabilizer when putting them together. You can use wash away thread for the basting frames to make it easier.

### Materials

**Cut Away Stabilizer**

**Temporary Adhesive Spray**

**Thin Batting**

**Fabric for front**

**Fabric for lining**

**Pins**

Lets get started!

Hoop a layer of cut away stabilizer. Load the design onto your machine. Stitch the first color. This marks where to put the batting on the stabilizer. Cut a piece of batting 8"x8". Spray the stabilizer with temporary adhesive spray and place the batting onto the stabilizer. Stitch the next color. This is the cutting guide for trimming back the stabilizer and batting, when the blocks are being put together. Spray the batting with temporary adhesive spray. Cut a piece of front fabric 8"x8" and place onto the batting. There is still a chance the fabric could move while stitching out the design, so I like to pin the fabric down. Make sure the pins are not in the embroidery area.

Stitch the flower design. There should be 2 or 3 colorstops left. Remove the hoop from the machine. Turn it over so the backside faces up. Spray with temporary adhesive spray. Cut a piece of lining fabric 8"x8" and place over the embroidered area. Change over to wash away thread and stitch the next color stop. This is a basting line and also the cutting guide and needs to be easily removed when putting the blocks together.

Change back to regular thread and stitch the remainder of the design. I used white thread for this but you can use other colors. I used a dark color thread for the basting/cutting guide so it is easier to see in the photo.
